

# COVERS *in Play*

## FEATURES

- ◆ Frame assembly is constructed from an extruded aluminum alloy and includes an integrated gutter system which collects and channels internal condensation to the outside of the enclosure
- ◆ Frame is finished with a premium quality architectural paint which is highly resistant to humidity, chalking, colour change, gloss shift and chemical cleaning (various colour choices are available)
- ◆ Panels are made from clear acrylic or twin wall polycarbonate (other colour options are also available)
- ◆ Tracks are made from an extruded aluminum alloy with an anodized finish (various colour choices are available)
- ◆ All components are made from non-corrosive material such as aluminum or stainless steel
- ◆ Glass sliding doors increase scratch resistance at entry points

## AUTOMATED DRIVE SYSTEM

- ◆ Patented design allows the pool enclosure to be opened or closed with the push of a button
- ◆ This feature is unique in the industry!
- ◆ Designed to ensure safe operation

## OPTIONS

- ◆ In colder climates, add a heating system to use the enclosed space all winter long
- ◆ Add an optional digital control system to electronically control the operating systems of the enclosed space

## WARRANTY

- ◆ 20 year warranty for frame and track
- ◆ 10 year warranty for glazing and paint finish
- ◆ Manufacturer's warranty for electronic components

## BENEFITS

- ◆ Increase ambient temperature by trapping solar heat, even on cloudy days
- ◆ Provide protection from inclement weather conditions such as rain, wind or snow with the flexibility of being able to enjoy the outdoors when weather permits
- ◆ Engineered for structural strength; designed to withstand local wind and snow loads without the need to remove snow
- ◆ Provide protection from the harmful effects of UV rays
- ◆ Minimize exposure to insects and reduce the risk of insect bites
- ◆ Reduce time spent cleaning pools and spas
- ◆ Year-round use of pools, spas and patio areas
- ◆ Reduce pool and spa heating costs, chemical use and water loss through evaporation

*COVERS in Play* designs and manufactures retractable pool enclosures with innovative designs and automated features that are unique in the industry.

*COVERS in Play* pool enclosures are engineered as the highest quality system in the industry to ensure safety, strength and ease of use. The highest quality materials are used to ensure durability and longevity.
